

BILAL RAMZAN

Senior Mobile Engineer | React Native, Flutter, iOS

ramzanbilal14@gmail.com | Pakistan (UTC+5) | Remote | linkedin.com/in/ramzanbilal | github.com/ramzanbilal

PROFESSIONAL SUMMARY

Senior Mobile Engineer with 8+ years building and shipping cross-platform and native mobile applications. Specializes in React Native (Expo and CLI), Flutter, and Swift/SwiftUI, backed by Node.js, Supabase, and Firebase. Proven record converting web products into production iOS and Android applications, refactoring AI-generated and unmaintainable codebases into typed and tested systems, and resolving App Store and Google Play rejections for release. Experienced in mobile architecture, CI/CD automation, app store submission, and technical mentorship of developers.

TECHNICAL SKILLS

Mobile (Cross-Platform): React Native, Expo (Managed and Bare), React Native CLI, Flutter, Dart, Ionic, Capacitor

Mobile (Native): Swift, SwiftUI, Kotlin, Native Modules, Turbo Modules, Expo Modules

Languages: TypeScript, JavaScript, Dart, Swift, Kotlin

Frontend and Web: React.js, Next.js, Vite, Redux, Zustand, TanStack Query, Tailwind CSS, HTML5, CSS3

Backend and Databases: Node.js, Express.js, REST APIs, GraphQL, Supabase, Firebase, PostgreSQL, MongoDB, MERN Stack

Mobile Libraries: React Navigation, Reanimated, MMKV, AsyncStorage, RevenueCat, StoreKit, Google Play Billing, Firebase Cloud Messaging, Push Notifications, Deep Linking, Offline-First Sync

DevOps and CI/CD: GitHub Actions, EAS Build, EAS Submit, Fastlane, Codemagic, TestFlight, Google Play Console, Git, Jira, Agile, Scrum

Practices: Mobile Architecture Improvement, Code Review & Code Audit, Performance Optimization, App Store Submission and Compliance, AI-Assisted Development,

PROFESSIONAL EXPERIENCE

Senior Mobile Engineer and Architect | Freelancer

July 2024 - Present | Remote

- Shipped iOS and Android apps to production for startup founders and product teams, with top-rated client feedback on Upwork.
- Architected React Native and Flutter apps end to end: state management, API integration, offline sync, push notifications, in-app purchases, and analytics.
- Converted Web Apps into native iOS and Android apps, auditing REST APIs for mobile readiness and adding deep linking, biometric auth, and in-app purchases
- Refactored AI-generated and legacy React Native codebases with TypeScript strict mode, centralized state, automated testing, CI, and crash reporting.
- Integrated subscription monetization with RevenueCat, StoreKit, and Google Play Billing across free, subscription, and referral tiers.
- Migrated apps across React Native and Expo SDK versions, upgraded native dependencies, and unblocked stalled iOS and Android builds.

Mobile Development Trainer | NAVTTC / Prime Minister's Youth Programme (via Excellence Delivered)

Oct 2025 - Dec 2025 | Pakistan

- Trained multiple sections of mobile developers in React Native, Flutter, and mobile application architecture through government-funded national skills programmes and private mentorship cohorts.
- Mentored developers through production builds, code reviews, and first App Store and Google Play submissions.

SELECTED PROJECTS

SocialTap | React Native, TypeScript, Zustand, MMKV, RevenueCat

Multi-platform media downloader supporting up-to 6 social platforms, with background downloads that persist after app close, quality selection, and batch downloads.

Dastaan | React Native, Expo, Supabase, MMKV, Archive.org API

Offline-first audiobook streaming application built on public domain archives, including streaming playback, download management, and Supabase-backed content catalogue.

Hometown Connect | Swift, SwiftUI

Fully native iOS and Android community platform delivered as lead iOS engineer and released on the App Store.

Be Well Be Healthy | Flutter, Firebase

Healthcare companion application with authentication, real-time data sync, and push notification delivery, released to both app stores.

HabitOS | React Native, Supabase

Habit tracking application covering product definition, architecture, build, and visual identity including app icon design.

Cleasnai | Flutter, Dart

Consumer-facing Flutter application built for the App Store and Google Play.

MyHayd | React Native CLI, Firebase

Built and released MyHayd to both the App Store and Google Play, covering Firebase authentication, real-time data sync, and push notification delivery.

Broski App | React Native, Node.js

EDUCATION

BS Computer Science | University Of Management And Technology

2014 - 2018 | Pakistan
